- 📜 Certificate of achievement

About Me

"I am Binyam Tagel, a Computer Science graduate from Debark University, specializing in web development and full-stack project design. I have expertise in React, PHP, and MongoDB, and I am passionate about building user-focused applications that solve real-world problems. I thrive in collaborative environments, continuously learning and adapting to new technologies. My goal is to contribute to impactful software solutions that enhance user experiences and business processes."

- 📁 Web Development Intern at Go2Cod
 - 📅 2024-10-30 -2024-10-30

Portfolio

ETC - Ethiopian Traditional Craft E-commerce

- Developed an e-commerce platform for Ethiopian traditional crafts, allowing artisans to sell their handmade products online. The platform features a secure Chapa payment integration, a user-friendly ProductList and ProductDetails page, and an admin dashboard for managing products and orders. Built using React, Node.js, and MongoDB, it ensures a seamless shopping experience.

HRM - Debark University Human Resource Management

- Designed and implemented a Human Resource Management System for Debark University, streamlining staff hiring and administrative processes. The system includes role-based authentication for HR Officers, Admins, Deans, Departments, Finance, Employees, and Applicants. Features include job applications, exam scheduling, result viewing, and applicant feedback. Developed using HTML, Bootstrap, JavaScript, PHP, and MySQL.
